Veeam is
purpose-built
for powering
data resilience

Extensive workload coverage unmatched in the industry

Native APIs

New for 2024

Cloud

- Amazon FSx
- AmazonRedShift
- Azure Cosmos DB

Coming soon in 2024

Virtual/Database

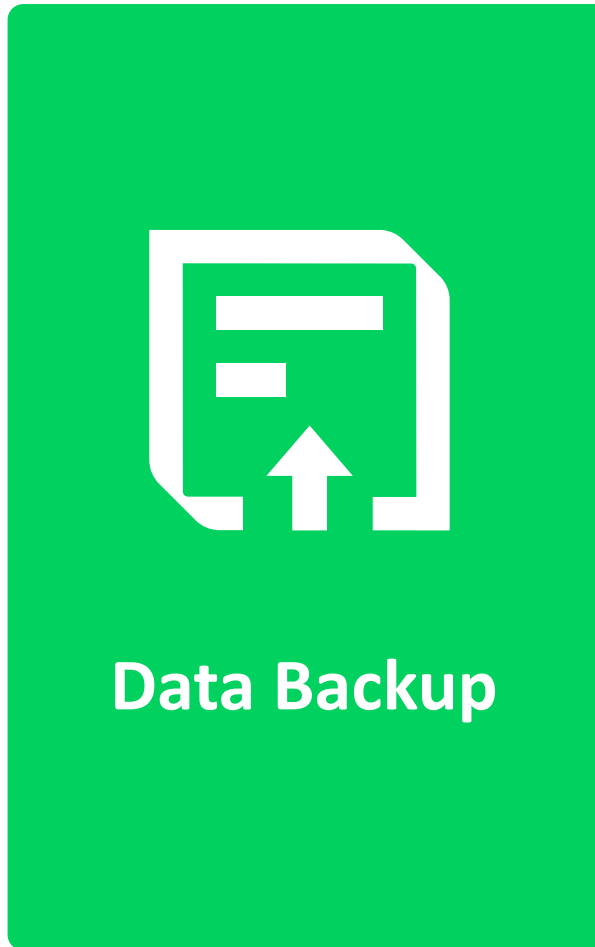

- Proxmox VE
- MongoDB

Cloud

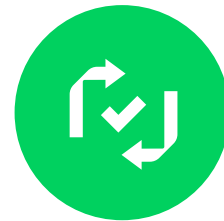

- Microsoft Entra ID
- Azure Data Lake Storage Gen2

Veeam has the most comprehensive backup capabilities

Industry best Recovery Point Objective (RPO) = minimal to no data loss

Broad coverage with platform-native backup

Optimized RPOs and RTOs with 4-in-1 protection

Automated recoverability testing with SureBackup

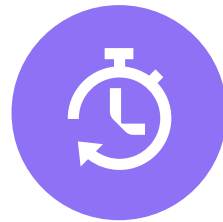

Unified backup management at enterprise scale

Veeam enables the fastest recovery with industry-leading RPOs and RTOs

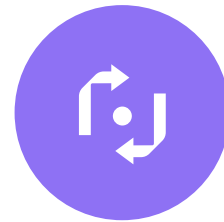

5x faster recovery¹ speeds vs competition • Flexible, portable, granular recovery

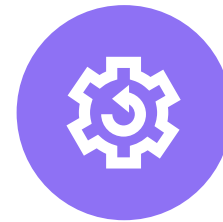

Data Recovery

Reduced
downtime with
Instant Recovery

Granular search
and recovery
across platforms

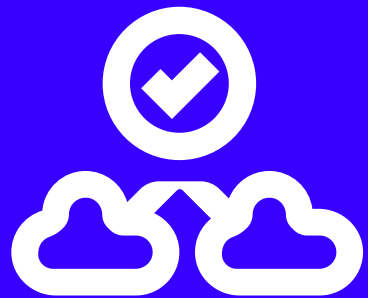

Advanced disaster
recovery planning
and orchestration

Clean, verified recovery
at scale
with Secure Restore

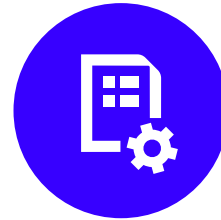

Patented Portable Data Format delivers complete Data Freedom that no other vendor can deliver

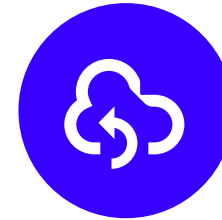

Data Freedom

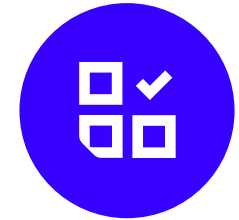

Broadest storage support, avoiding vendor lock-in

Migrate and modernize your apps and infrastructure

Recover from anywhere to anywhere

Modern protection for modern workloads

Veeam's AI-driven threat detection is the industry benchmark

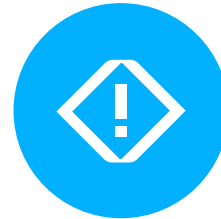

Veeam has integrated the most comprehensive array of threat detection technologies

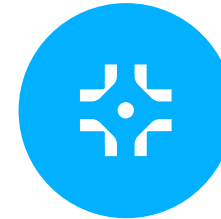

Data Security

Built-in security
with a Zero Trust
Architecture

End downtime with
Incident Response
services and tools

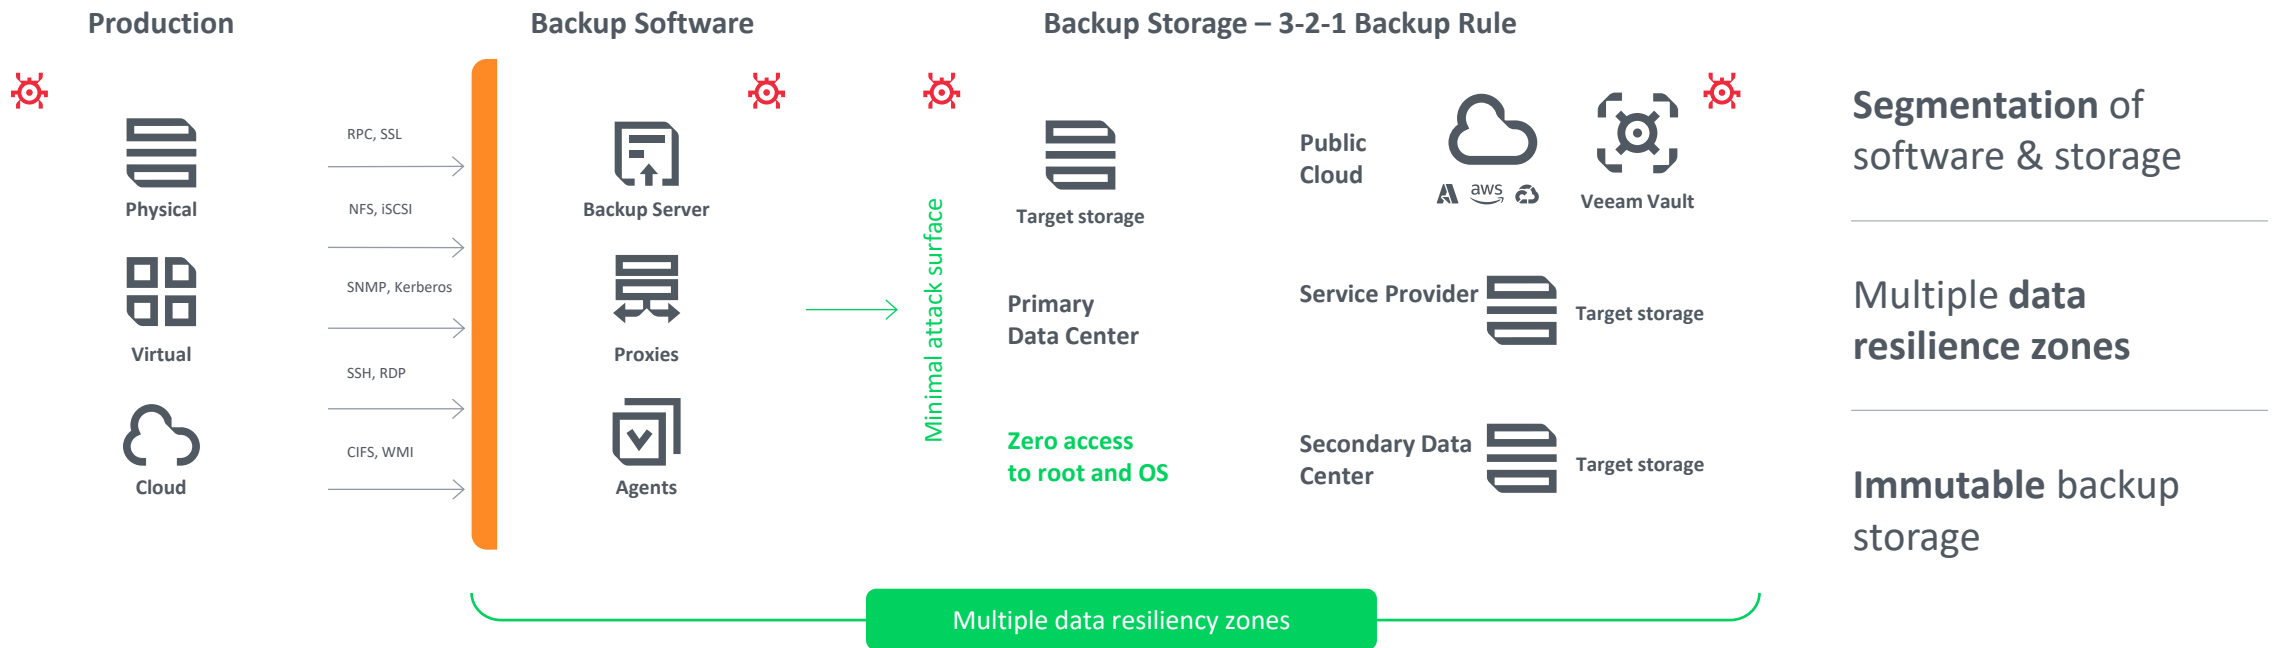

Detect threats
earlier with proactive
threat hunting

Data integrity
with immutability
everywhere

Hardware-agnostic security with Zero Trust Data Resilience

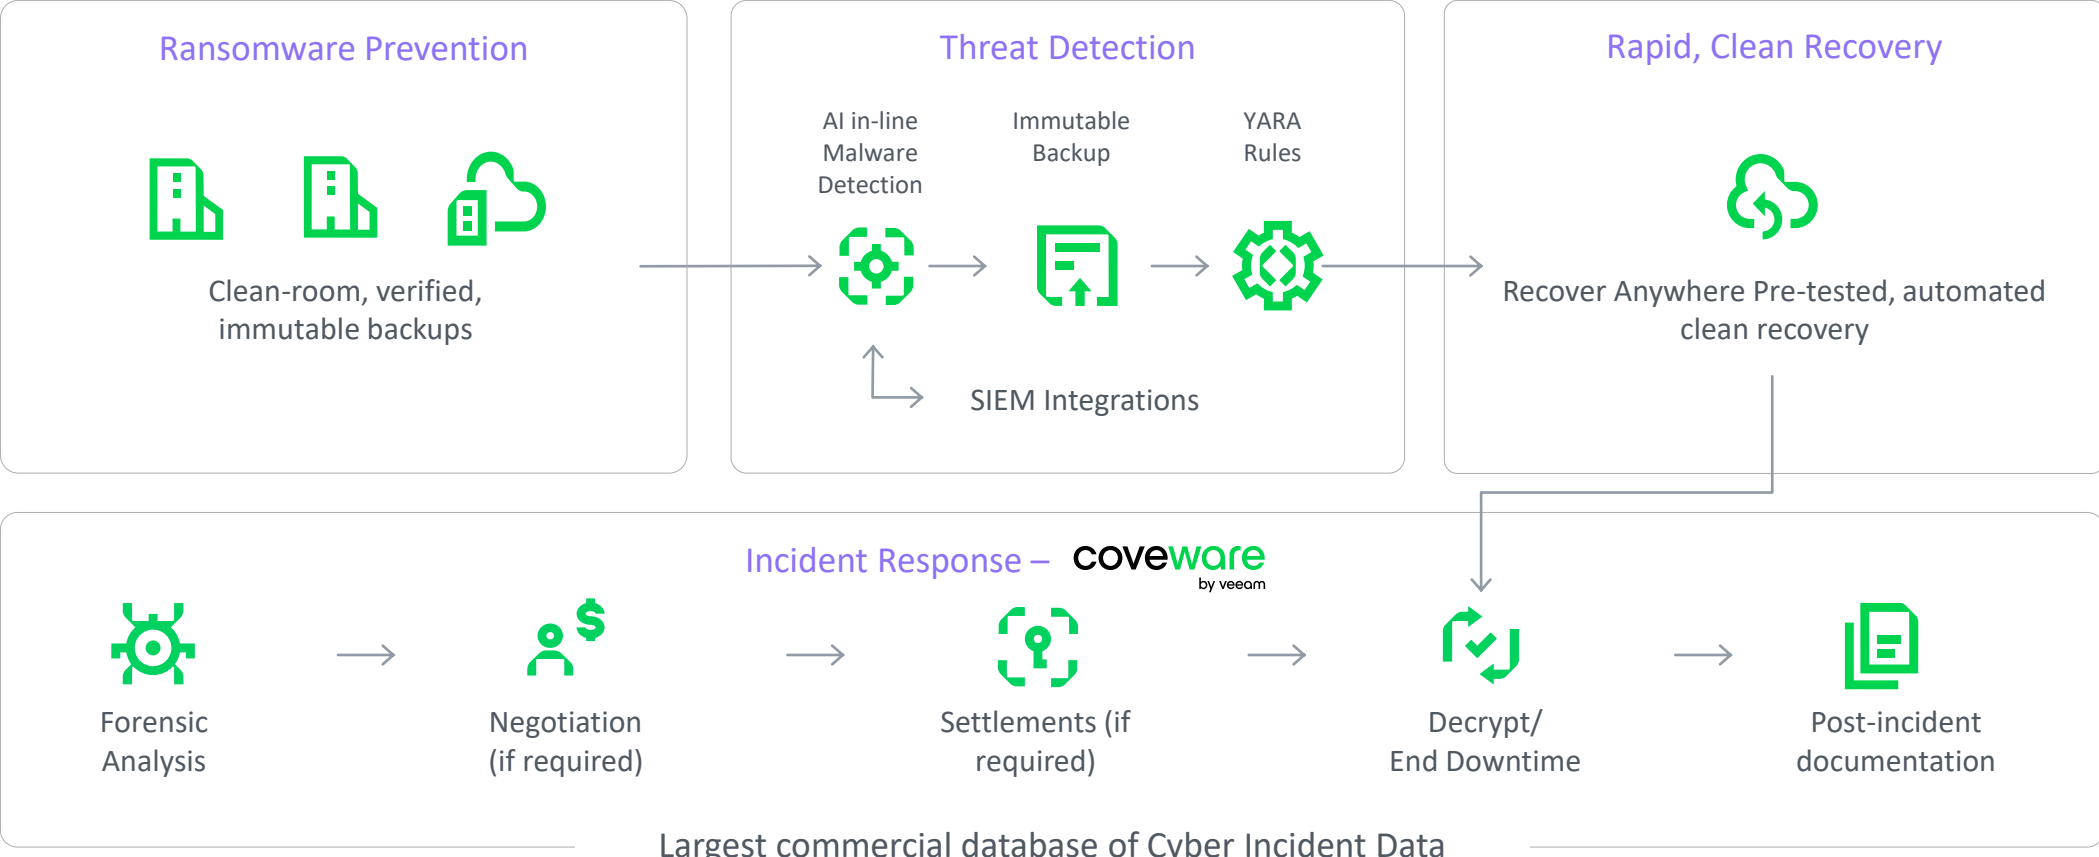

Secure by design with Zero Trust Architecture

Veeam provides the most complete end-to-end ransomware protection and recovery

Veeam Cyber Secure Program

24/7/365 SWAT Team | Health Checks | Ransomware Warranty | Incident Response Retainer

Driving relentless innovation to derive deeper insights from your data

Data Intelligence

AI-powered detection and security scoring

Teams get answers faster with AI Digital Assistant

Automatic diagnostics and remediation analysis

Backup data reuse for data mining, dev/test

Future Roadmap

Joint development to integrate with Microsoft Copilot

Data protection of AI model workloads (LLMs, MLs, NLP)

Enabling customers to unlock insights with AI from their immutable backup data

Flexible delivery, customer choice: self-managed software or as-a-Service

Software Subscription

Veeam Data Platform

- Self-managed on-premise, cloud, or hybrid

as-a-Service (SaaS)

Veeam Cloud Service Providers (3rd party)

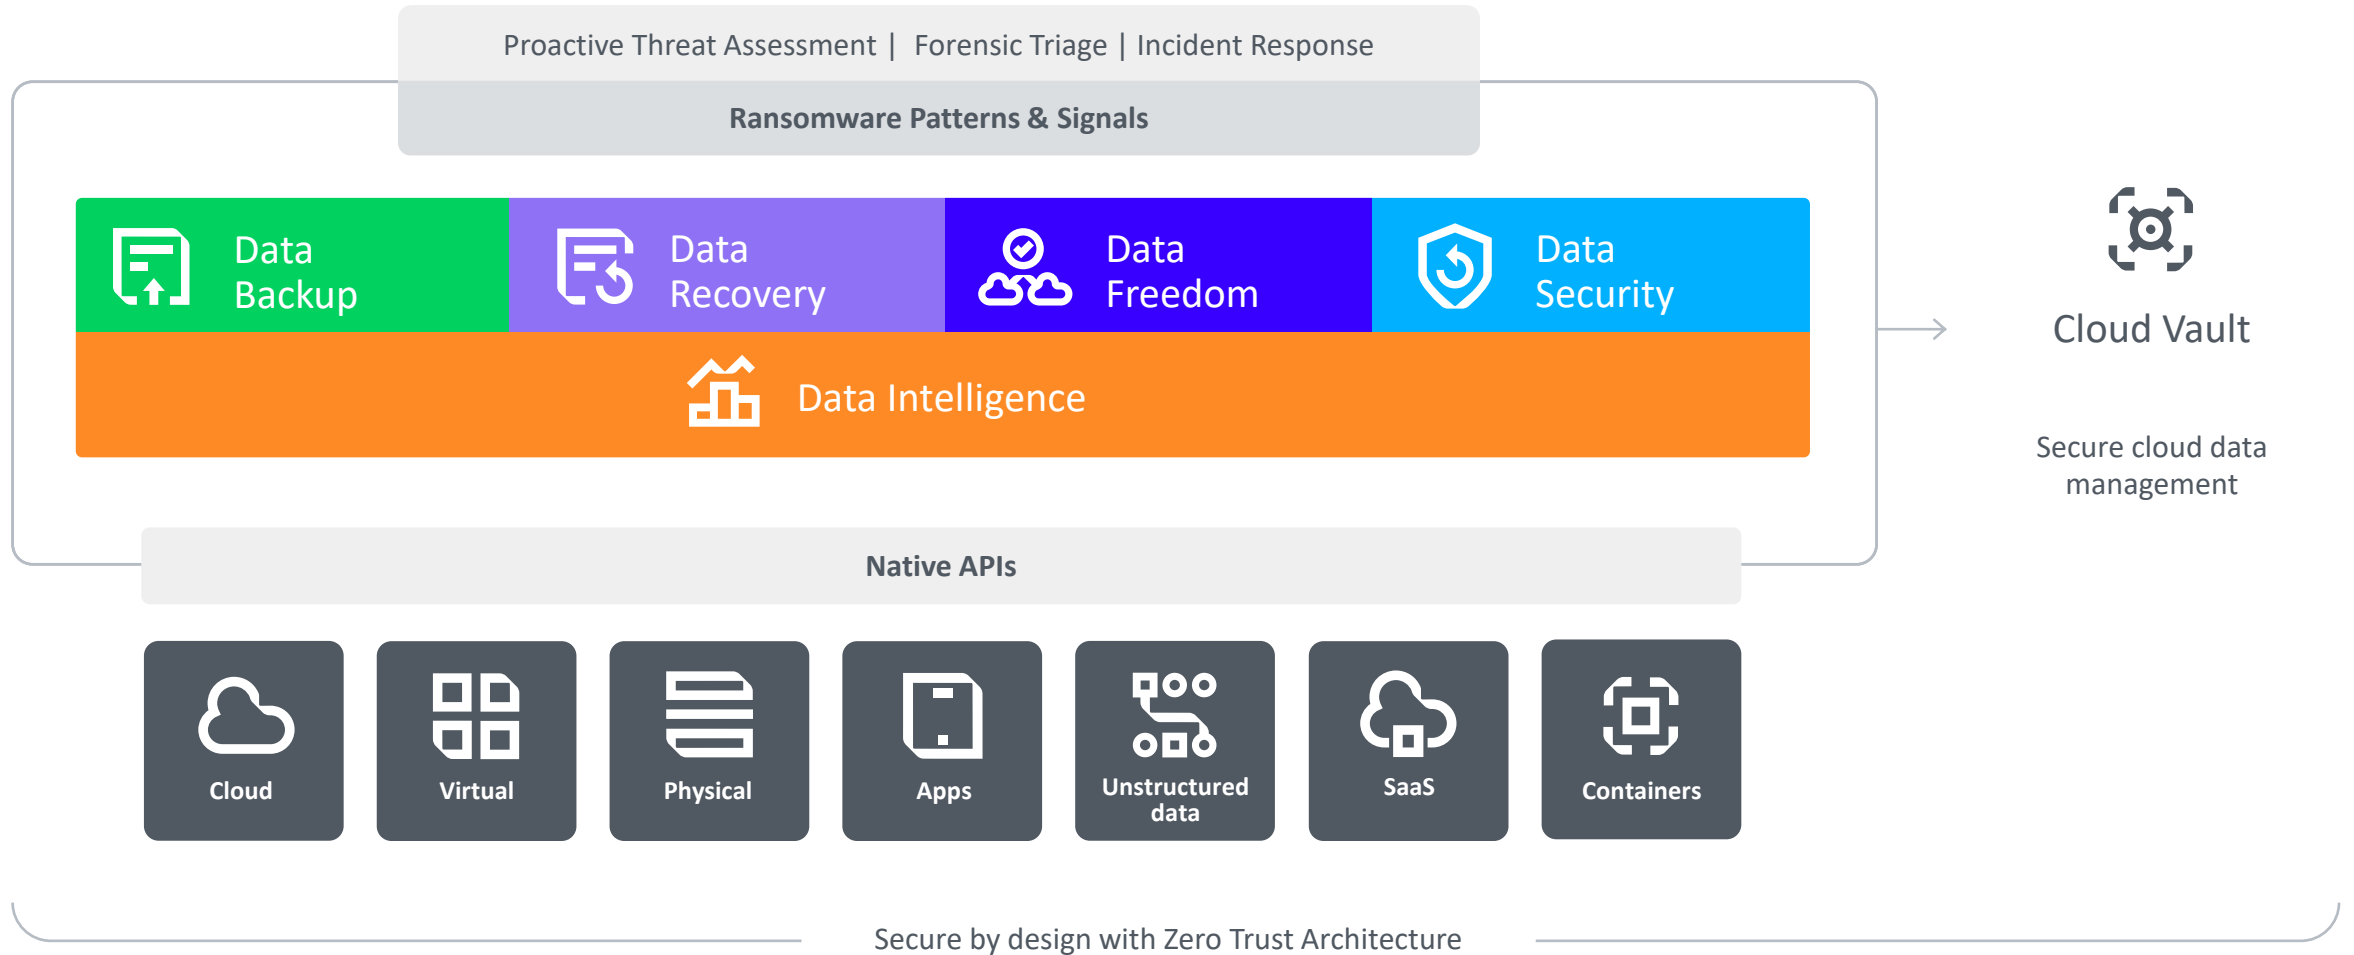

Veeam Data Cloud (1st party)

- Managed service through Veeam cloud service providers
- 1st party Veeam managed service for M365, Azure, AWS
- All services will eventually be provided as-a-service

Products that bring data resilience to life

Veeam is #1 in Data Resilience

Magic Quadrant, ability
to execute
Gartner

The Veeam logo is centered on a green background. It consists of the word "veeam" in a white, lowercase, sans-serif font, enclosed within a white-outlined rectangular box with rounded corners. Behind the box, there are two large, semi-transparent, light-green shapes that resemble stylized arrows or chevrons pointing outwards.
